Change application version string to the latest version in EPOS	
Configure merchant terminal	
Perform Host Download on terminal (ADMIN 6-Maintenance 1- DLL Parameters option)	

Definition of Terminal/Task ID

Terminal/Task ID	Description and expected result
80000005	<p>This task installs the latest CT-Payment PAX S80 payment application and downloads several files to the terminal.</p> <p>This download is slower due to the size of the application and the number of files involved. Once the download procedure is completed, you will not be required to reboot the terminal. Press OK on the screen where the message is "Download OK" and then press CANCEL when menus appear.</p> <p>The terminal will then start the CT-Payment application by displaying the version and software string for 3 seconds. Once the application boot sequence is completed, the terminal should display that "You must set admin password". The default password of 000000 must be changed by the merchant (see PAX S80 Set-up Guide).</p> <p>The application installation is complete and terminal is ready to process transactions.</p>
